

Huntington-Oyster Bay Audubon Presents

Preserving Plum Island for Future Generations with Chris Cryder of Save the Sound November 9, 2016 7pm

In 2009, Huntington-Oyster Bay Audubon was one of two founding members of the Preserve Plum Island Coalition, which was formed to save Plum Island, situated off the North Fork of Long Island, from being sold to the highest bidder. This beautiful island, an Audubon designated Important Bird Area, is a critical stopover site and breeding ground used by approximately 220 species, including endangered and threatened bird species. This virtual tour of Plum Island uses new imagery by photographer Robert Lorentz to illustrate the uniqueness and beauty of this important wildlife habitat. While efforts to protect Plum Island has been gaining momentum, the fight is far from over!

About the Speaker: Chris Cryder joined Save the Sound in May 2007 and is responsible for coordinating various outreach activities for CFE and Save the Sound, as well as implementing green infrastructure projects.

Prior to joining Save the Sound, Chris was a member of a citizen activist group, the Alliance for Sound area Planning (ASaP), which partnered with CFE in the fight to protect "The Preserve," a 1000-acre forest and wetland area in Old Saybrook. He studied biology as an undergraduate, and has a master's in health services administration.

All meetings are free and open to the public!
