Nature Through the Lens: Nature Photography Fundraiser for HOBAS 6pm - 7:15pm

Come and view beautiful nature photographs by Huntington HS honors student, Alexa Helburn.

These original photographs, featuring images from recent HOBAS field trips, will be available to take home and enjoy as a token of appreciation for your generous donations to HOBAS (cash or checks, please). These photos will make great Father's Day and graduation gifts for the nature lovers in your life. Support HOBAS and the work of an aspiring local photographer!

Plants for Birds Program 7:30pm

Learn about the benefits of planting with native plants and come with your gardening questions as we explore landscaping ideas for birds and for other wildlife.

Get inspired to grow more native plants in your yards, gardens, patios, and balconies to support bird conservation efforts for both our resident and migrating birds. Our speaker, Dr. Rowden will enlighten us about how landscaping with native plants can turn

a patchwork of green spaces into a quilt of restored habitat.

About the Speaker: John Rowden joined Audubon in 2009 when he was hired by the New York City chapter to direct citizen science and outreach throughout the city. In 2013, he transitioned to the National Audubon Society, first working on the Toyota TogetherGreen program before becoming Audubon's Director of Community Conservation in 2016. John's work at Audubon has focused on engaging new audiences in the organization's conservation efforts, personally and through Audubon's extensive national network. He holds a PhD in Zoology from Duke University.
