Mail to:

HOBAS Bird Seed Sale

PO Box 735

Huntington, NY 11743

Please contact Michael Frank, HOBAS Treasurer, at (631) 252-1082 should you have any questions.

Huntington-Oyster Bay Audubon - Annual Bird Seed Fundraiser

Seed Descriptions:

- **No Mess Blend**– A high-quality, no-waste mix without shells. Contains 65% medium sunflower chips, 15% diced/chopped/small peanut pieces, 10% hulled white millet. Will attract most winter feeder birds including nuthatches, woodpeckers, cardinals, juncos, white throat sparrows and titmice.
- **Deluxe Blend** – A combination of high-oil content seeds with shells. 63% black oil sunflower, 25% white millet, 10% safflower, 2% striped sunflower. attracts a large variety of birds.
- **Black Oil Sunflower** – A favorite of almost all seed-eating birds, your feathered friends will happily fill up on this high fat seed.
- **Shelled Sunflower** – Whole sunflower seed kernels. No shells, **no waste**. An excellent feed. Everyone loves this.
- **Safflower Seed** – The cardinal’s choice! Glossy white seeds are the **favorite food of cardinals**. Also eaten by chickadees, finches, and doves. Ignored by squirrels, starlings, and blackbirds. An excellent seed for year-round feeding.
- **Nyjer (Thistle) Seed** – Tiny black seeds for goldfinches and pine siskins. Nyjer must be placed in a special feeder with tiny holes. Nyjer is ignored by squirrels and starlings. Use your Nyjer feeder year-round.
- **Finch Blend:** A 50/50 mix of Nyjer and fine sunflower chips, which helps attract even more birds to your finch feeder such as chickadees and downy woodpeckers.
- **Shelled Peanut Splits** – Peanuts are the best single source of protein and fat for birds and a great addition to the choices you offer in your yard. Woodpeckers, nuthatches, blue jays, tufted titmice and chickadees love this!
- **Suet Cakes** – Each 11.75oz cake fits in a wire suet cage. High protein and fat content with no waste, no fillers and real fruit! Woodpeckers love suet and so do other birds!

Reminder - All orders due by Saturday, October 16th, 2021. Thank you for your continued support!

Note About Unidentified Songbird Illness:

This summer, an unknown illness began affecting young songbirds in states to the south and west of New York. Per NY’s Department of Environmental Conservation (DEC), to date there is no evidence of bird mortality in New York due to this illness and has not officially recommended removing bird feeders and baths. As the disease begins to decline elsewhere, the DEC anticipates it will not become a factor affecting birds in the state.

It is always a good idea to keep feeders clean by following these steps:

1. Clean feeders and bird baths with soap and water at least once a week, then disinfect with a 10% bleach solution to prevent potential infectious disease spread between birds and other wildlife.
2. After cleaning, rinse well with water and allow to air-dry.
3. When handling bird feeders and baths be sure to wear disposable gloves and wash your hands when finished.
4. Keep pets away from sick or dead birds as a standard precaution.
5. To dispose of dead birds, place them in a sealable plastic bag and discard with household trash. This will prevent disease transmission to other birds and wildlife.
