

Live Webinar: Fall Native Plants for Birds

Tuesday, October 20
7 PM EST
Via Zoom

Please join us for a presentation on Fall Native Plants for Birds with Landscape Ecologist, Rusty Schmidt. This presentation will focus on the fall flowering plants that provide such important nectar sources for our migratory butterflies and bees, and on the many seed and fruit producing perennials and shrubs for the birds, especially for the fall migration, as well as sustainable fall cleanup to help our beneficial insects.

When: Oct 20, 2020 07:00 PM Eastern Time (US and Canada)

Register in advance for this webinar using the following link:

<https://bit.ly/HOBASOctober>

After registering, you will receive a confirmation email containing information about joining the webinar.

About Our Speaker: Rusty Schmidt is a wildlife biologist and landscape ecologist with over 30 years of experience, primarily in designing alternative methods for managing stormwater and habitat restorations. Mr. Schmidt is also the co-author for three books on plant selection for stormwater management. He is currently managing two 6-acre pollinator habitats, writing sustainable management plans for large religious campus and is the lead designer for a number of green infrastructure projects across Long Island.
