

Survival by Degrees Virtual Webinar

Wednesday, January 13, 2021
7 PM EST
via Zoom

Join us to explore Audubon's newest climate report, *Survival by Degrees*, with Dr. Brooke Bateman, Director of Climate Science at the National Audubon Society. She will walk viewers through findings and challenges of the report as well as how bird communities are being affected by climate change. She will then speak to what individuals, communities and government can do to mitigate climate change. We'll finalize this talk with a live Q&A.

About Our Speaker: As the Director of Climate Science at the National Audubon Society, Dr. Bateman collaborates with scientists, volunteers, and Audubon's Climate Initiative team to develop research focused on climate and the conservation of birds and the places they need today and in the future. Dr. Bateman received her PhD in Zoology and Tropical Ecology at James Cook University in Australia in 2010, a Graduate Diploma of Research Methods from James Cook University in 2006, and a Bachelor of Science, cum laude, from Boston College in 2003.

When: Wednesday, January 13, 2021 07:00 PM Eastern Time (US and Canada)
