

## Nocturnal Fall Migration and Flight Calls

**Wednesday,  
September 8, 2021  
7 PM EST  
via Zoom**

Fall migration is upon us and soon thousands of ducks, hawks, and passerines will be passing by our favorite birding patches. While some of these species migrate through our area during the day, a lot of birds will actively migrate through the night. Why do birds do this? How do they communicate with each other? How do they navigate? In this program we will share findings, pose some critical thinking questions, and spend time discussing other wonderful components of fall migration.

**About Our Speaker:** Ben Barkley studied Natural Resources in Cornell University and spent 5 years working at the Cornell Lab of Ornithology. A passionate birder, Ben has recently spent time birding in Papua New Guinea, India, Sri Lanka, Kenya, Panama, Israel, Peru, and New Zealand, but has recently migrated back home. In college he developed a love for education and teaching others about birds. For the past 5 years, Ben has worked at the Environmental Education Center at Lord Stirling Park, which is part of the Somerset County Park Commission.

**When:** Wednesday, September 8, 2021 07:00 PM Eastern Time (US and Canada)

**Register in advance** for this webinar using the following link:
